Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda, Angola Celeste Sambeny 2016-06-22 Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda, Angola presents a detailed study of

students and lecturers at higher teacher training institutions where English is taught as a medium of instruction and specialisation. As such, the book will help raise the awareness of educators, teachers and supervisors of the need to be more supportive to students, and will highlight the importance of increased responsibility on the part of the students regarding their studies, especially during the process of writing their research reports. Practical experience has shown that, in most classrooms, students are typically asked to produce texts for one single audience, namely the teacher or the lecturer, who already knows what constitutes an acceptable response. However, in many classrooms, teachers and lecturers tend to believe that literacy can be defined as the ability to encode and decode texts, the ability to decipher the 'main idea' of a reading passage or to write a text that obeys the general conventions of language usage such as syntax, organisation, and idea development. The central argument of this book, however, is that, at higher levels of the educational system in Angola, academic and research literacy practices are, at best, questionable and, at worst, harmful. An extensive re-evaluation of assumptions regarding student capability and what it means to be a literate in the twenty-first-century 'information society' is of critical importance. Such a re-examination allows for extensive reflection on current practices and a powerful critique of 'traditional' academic and research literacy methods, and suggests ways in which practices of quality teaching and learning may be implemented.

Riff Romesh Gunsekera 2015-11-16 Im Jahr, als Sri Lanka unabhängig wird, kommt der elfjährige Triton als Boy in das Haus von Mister Salgado, einem Meeresbiologen, der nur einen Lebensinhalt hat: das gefährdete Universum des Ozeans. Für den Jungen wird das Haus des Junggesellen zu einem abgeschlossenen Mikrokosmos. Er lernt, das Silber so zu polieren, dass es schimmert wie geschmolzenes Sonnenlicht, den Liebeskuchen mit zehn Eiern zu backen und für die Freundin seines Herrn den Papageienfisch zu dünsten. Und er lernt, mit wachen Augen die politischen, sozialen und amourösen Ränkespiele zu beobachten. Hintergründig erzählt Triton seine Geschichte. Naiv und wissend zugleich, tapfer und ängstlich - die eindruckliche Stimme eines Jungen, der in einer zerbrechenden Welt erwachsen geworden ist.

Mobility of Knowledge, Practice and Pedagogy in TESOL Teacher Education Anwar Ahmed 2021-03-08 This edited book brings together chapters from diverse geographical and educational contexts to examine the question of transnationalism in English Language teacher education. While the activities that connect people, institutions and cultural practices across the borders of nation-states have gained interest in fields such as applied linguistics, TESOL and migration studies in recent years, there has been little research so far into how transnationalism intersects with language teacher education, and how existing practices can be better integrated into teacher education programmes. The authors fill this gap by introducing and examining existing transnational practices - including cross-cultural settings, study abroad programmes and online teacher education - then offering multiple dialogues on mobility of knowledge, practice and pedagogy in teacher education. This book will be of interest to language teachers, teacher educators, and students and scholars of applied linguistics, cross-cultural studies, and migration studies.

Cross-National Information and Communication Technology Policies and Practices in Education Tjeerd Plomp 2009-04-01 This compendium of papers documents educational ICT policies and practices in 37 countries, making it a valuable resource for understanding and comparing ICT-related national policy developments in education. We believe that this work offers a unique in-depth examination of the trends

within major education systems and how they have adapted to and taken advantage of the challenges and opportunities posed by the new information and communication technologies. A special feature of this edition is that it allows for interesting comparative analyses of sub-groups of countries, as many Asian, European Union, and former eastern-European countries, as well as the United States and Canada (among others), are included in the book. But it allows also for other than regional comparisons given that a number of newly industrialized countries (such as Brazil, Chile, Malaysia, and South Africa) are represented in this book, together with many OECD countries. This book is the result of the effort and hard work of the contributing authors, many of whom are the NRCs for IEA SITES in their respective countries. Special thanks must go to the Norwegian Royal Ministry of Education and Research and the Netherlands Kennisnet ICT OP School Foundation, both of which provided generous support for the preparation and dissemination of the book, to the Center for Information Technology in Education (CITE) of the University of Hong Kong, which assisted in the technical preparation of the manuscript, and to the IEA Secretariat, which facilitated the copyediting of the chapters. We want to acknowledge especially the professional contribution of Paula Wagemaker, who has copyedited the entire volume. This copyediting work is especially critical and challenging, as many of the chapters were written by authors for whom English is a foreign language. We also want to express our appreciation to David Robitaille, chair of the IEA Publications and Editorial Committee, and his committee for the critical and constructive review of the manuscript.

General Science for Tropical Schools; Teachers Handbook to the Second Edition of the Textbooks Frederick Daniel 1938

Advancing Supervision in Clinically Based Teacher Education Rebecca West Burns 2022-02-01 Supervision in teacher education is entering an exciting time. In the last decade, national reports calling for the transformation of teacher preparation have advocated for greater school-university collaboration and increased clinical preparation of teachers (AACTE, 2018; NCATE, 2010). Thus, institutions with teacher preparation should be increasingly concerned with the clinical component of their teacher certification programs (AACTE, 2010; 2018; NCATE, 2001; NEA, 2014). However, supervision in teacher preparation has historically been held in low regard, (Beck & Kosnik, 2002; Feiman-Nemser, 2001; The Holmes Group, 1986; Hoover, O'Shea, & Carroll, 1988; Soder & Sirotnik, 1990) even though research has shown that high-quality supervision promotes teacher candidate learning (Bates, Dritz, & Ramirez, 2011; Burns, Jacobs, & Yendol-Hoppey, 2016; Darling-Hammond, 2014; Gimbert & Nolan, 2003; Lee, 2011). In fact, university supervisors "may be the most undervalued actors in the entire teacher preparation equation when one considers the knowledge, skills, and dispositions they must have to teach about teaching in the field" (Burns & Badiali, 2016, p. 156). Despite this research, the function of supervision has often been relegated to adjunct faculty or even removed the university-based supervisor altogether in some colleges/schools of education (McIntyre & McIntyre, 2020; NCATE, 2010; Slick,

1998; Zeichner, 1992, 2005). These practices are incredibly problematic for actualizing clinically based teacher education. Thus, the road to transforming teacher education must involve addressing such long standing misperceptions about what supervision is, what purpose it serves, and how it can be renewed from an afterthought to become the driving engine of high quality teacher preparation. Advancing Supervision in Clinically Based Teacher Education: Advances, Opportunities, and Explorations aims to elevate supervision and supervisors, as undervalued actors, by disseminating high-quality manuscripts on this critical area of study. The chapters in this book tackle the persistent issue of devaluing and marginalizing supervision in some institutions of higher education by sharing current research, illuminating challenges of supervising in the current high stakes accountability climate, and offering innovative ideas that can improve supervision in clinically based teacher education.
